

Q12.Program to demonstrate widget?

```
from tkinter.simpledialog import askinteger
from tkinter import *
from tkinter import messagebox

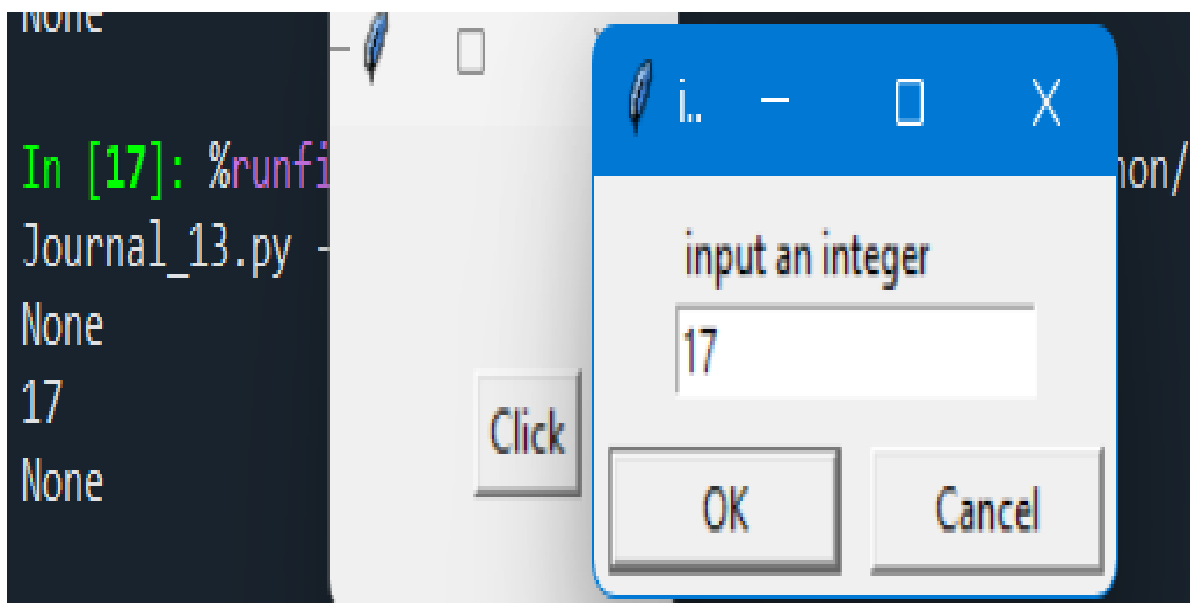

top = Tk()
top.geometry("100x100")

def show():
    num = askinteger("input","input an integer")
    print(num)

B = Button(top,text = "Click",command = show)
B.place(x = 50,y = 50)

top.mainloop()
```

Output:

Q13.Program to demonstrate widget?

```
from tkinter.simpledialog import askfloat
from tkinter import *

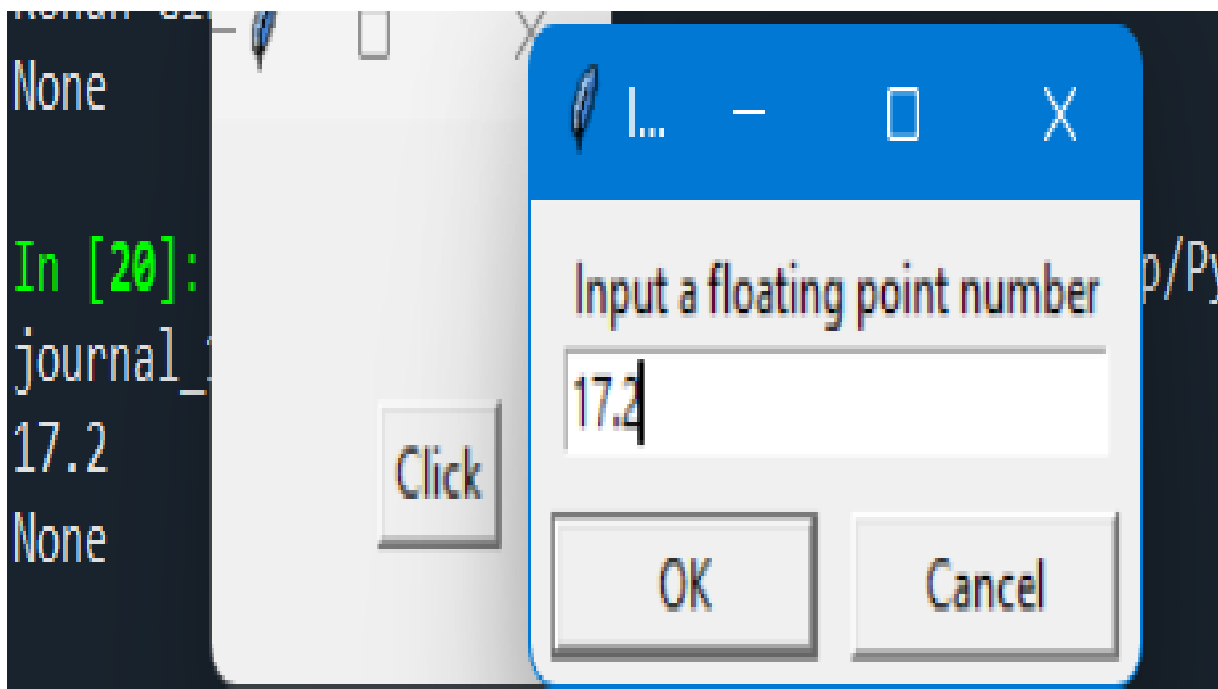

top = Tk()
top.geometry("100x100")

def show():
    num = askfloat("Input","Input a floating point number")
    print(num)

B = Button(top,text = "Click",command = show)
B.place(x = 50,y = 50)

top.mainloop()
```

Output:

Q14. Program to demonstrate widget?

```
from tkinter.simpledialog import askstring
from tkinter import *

top = Tk()
top.geometry("100x100")

def show():
    name = askstring("Input","Enter your name:")
    print(name)

B = Button(top,text="Click",command = show)
B.place(x = 50, y = 50)

top.mainloop()
```

Output:
